# AutoTrack Accelerated Training

AutoTrack training presentation either web-based or in-person

## AutoTrack Accelerated Training

AutoTrack training presentation either web-based or in-person

AutoTrack is the most powerful vehicle swept path analysis program available today with more features and capabilities than anything else you'll see. AutoTrack training allows you to fully realise this functionality in the shortest possible time. The result is that you are able to undertake even complex analyses at short notice and with confidence.

Our **Accelerated Training** is for those who don't have time for a full one day hands-on course. The three hour presentation can be provided in person (at your premises or ours) or over the internet in the form of a Microsoft Live Meeting. The course covers the basics of AutoTrack but also explains the newest additions to the system.

Course content is as follows:-

- Introduction to AutoTrack
- Settings (using the Wizard)
- Drive modes
- Dynamic editing to adjust paths
- Using the Template Generator
- Report creation and editing (using the Wizard)
- Using the Drawing Explorer to make changes to multiple paths
- Using the Vehicle Wizard to create and edit simple vehicles
- Creating simple animations
- Overview of vertical clearance mode
- Overview of parking layout tools
- Questions from the floor

### Features

- Flexible format
- Presented by one of our top trainers
- Affordable alternative to full hands-on training
- Discounts for groups
- Venue to suit you or opt for training via Live Meeting for minimum disruption
- Question and answer session
- Buffet lunch provided (for presentations held at our premises)

### Benefits

- **Learn from the authors how AutoTrack was designed to be used**
- **Choose the venue that works best for you**
- **Be prepared for those urgent jobs**
- **Receive follow up advice and assistance**
- **Develop greater confidence in your designs**
- **Add value to your investment**

**Note: All presentations require that trainees have at least a basic familiarity with CAD systems.**

## Accelerated Training Booking Form
