

AutoTrack Training

AutoTrack is the most powerful vehicle swept path analysis program available today with more features and capabilities than anything else you'll see. AutoTrack training allows you to fully realise this functionality in the shortest possible time. The result is that you are able to undertake even complex analyses at short notice and with confidence.

The **Level 1 (Essential)** 1 day course content is as follows: -

- Introduction to AutoTrack
- Basic theory of vehicle movement (Ackermann steering, spine vehicle used for analysis)
- Understanding Settings & Properties (covers the Settings Wizard and advanced Settings tabbed dialogs)
- Driving (covers all drive modes, including Guided Drive for Light Rail users)
- Use of dynamic editing to adjust paths
- Using the Template Generator
- Reporting and use of the Drawing Explorer (covers the Report Wizard and the advanced Reports tabbed dialogs)
- Use of the Vehicle Wizard to create and edit simple vehicles
- Creating simple animations
- Overview of vertical clearance mode
- Overview of parking layout tools

The **Level 2 (Advanced)** 1 day course follows on from the Level 1 course and covers the following: -

- Drawing management (includes layer management, export/import data, copying settings, purge & repair)
- Use of the Advanced Vehicle Editor to create and edit complex vehicles (special axle types, user defined body outlines, load tracking)
- Advanced animation techniques (multiple vehicles, adding start delays and pauses, annotation, etc)
- Advanced theory of vehicle movement (vehicles with rear steering, multiple axles, tyres, etc)
- Use of the Vertical Clearance mode to check headroom and ground clearance
- Using the Parking Layout tools to create and edit parking areas.

Features

- Relaxed training environment
- Hands-on workshop sessions mean you learn faster by doing
- Personal copy of user manual
- Low trainee/tutor ratio (maximum group size 6)
- Discounts for groups
- Training at our premises or local to you
- Certificate of completion
- Morning and afternoon refreshments and buffet lunch provided

Benefits

- **Learn from the authors how AutoTrack was designed to be used**
- **Learn faster away from the office environment**
- **Be prepared for those urgent jobs**
- **Receive follow up advice and assistance**
- **Develop greater confidence in your designs**
- **Add value to your investment**
